

Zigmont Magic FX Inc v.09

We provide professional fireworks displays very close up and personal with our multi shot battery display that uses large caliber high power 500 gram 1.4 Consumer fireworks and professional 1.4 outdoor proximity fireworks that leaves little debris or mess on property. These are some of the same effects that Disney and Universal Florida use in their displays. Light up your sky!

We offer the best quality fireworks providing you with customized and quality service. Let us provide you a WOW FACTOR at your event! Don't settle for low price shows, you get what you pay for. Our shows start at \$5000 for a 900 shell display. That's right we charge by the shell so you can compare. We price shows by the number of shells of top quality fireworks used. We pay all fire marshal fees. We have fired 100 feet from a 100,000.00 golf green at a prestigious golf million dollar

course and 200 feet from a 15 mansion as well as a see through event tent structures.

- PASCO COUNTY FAIR ASSOCIATION SPARKLEBRATION 2005 & 2006**

Questions and Answers

Q: Why a 1.4 Low- Level display?

Low Level Firework fit that niche when indoor pyrotechnics is too small and 1.3 high aerial is too big. If you haven't experienced a low level proximate fireworks display then your audience will be in for a treat, as they will be only 75 feet away from the Display Perimeter. We specialize in large caliber 1.4 Consumer fireworks and professional 1.4 outdoor close proximity fireworks. The precision of our fireworks makes it possible to have a display in places you never thought possible. Our results are amazing!!!

Q: How much does a display cost?

A: Many people ask, how much does it cost for a big show. This question is not the easiest to answer. A three thousand dollar show might be a big show to some people as where a twenty thousand dollar show might just be a start for others. Our smallest display package on *private property start at \$3800 in central Florida, this inclusive price covers the cost of fireworks, technicians and display insurance coverage of one million dollars. Our packaged displays are guidelines to the best time frame with the best number of shells.

Q: How can I decide what to do for my show?

Most people usually have an idea and a budget, but if you just want to know what's possible you should call or email us. We have 20 years of experience in fireworks, special effects, theater production, and the entertainment industry. Call Zigmont and our friendly and knowable FX experts will help you.

Q: How long will my display last and what would it include?

A: We do not sell time, we sell how many shells are in the air at one time. There are so many variances in the different types of materials that can be used, it is better not to sell time. Smallest budget display runs 3-5 minutes in length. Budgets averaging \$5000 - \$12,000 run in the 6-25 minute range. Once we have looked at the site, we will give you some ideas about the content of the show. We can use goggle earth at first to get an idea what the site looks like. Your display will include a Variety of over 45 + different effects.

Q: QUANTITY VS. QUALITY?

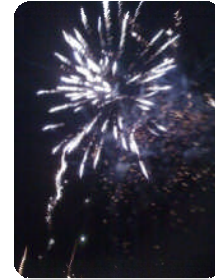

A: One important pitfall to avoid is the inclination to gauge the quality of a fireworks proposal by the amount of shells proposed. The reason this is dangerous is that if the proposal is based upon how many shells are represented rather than the quality of the products, more often than not you will end up with the cheapest and least reliable products available. This can jeopardize the integrity of the presentation and even be dangerous to the crew and the audience. Remember, the bitterness of poor quality remains long after the sweetness of low prices. We use only the best world class fireworks products. Our shells are the best fireworks that we have tested and approved.

Many of our shows have been considered the "best of the best" when utilizing medium or small sized effects by creating an artistically choreographed presentation that emphasizes their unique qualities in a beautiful design.

Q: What about permits?

A: Fireworks Florida will handle all details for your fireworks display. Most permits must be applied for 15 days prior to your event date. We supply all necessary permits. Most Venues will require additional insurance policies. We provide the insurance coverage certificates to all parties involved.

Q: What about permission from the place we are having the reception?

A: You need the permission of the property owner or venue management. Many people are intimidated when asked if you can shoot a display on their property. Chances are no one has ever asked them this question before or they have a designated arena. One of their biggest concerns are they think they will be held liable if something happened. This is not the case. They will want to see our licenses, insurance and the firework permit once issued.

Q: How do we get started?

A: To reserve a display date we require a 50% down payment (availability is based on a first come first serve basis.) We will send you a contract, please sign the contract and send it back with your down payment. After receiving the down payment we will, in a timely fashion, look at the site and obtain any necessary permits. If for some reason a permit cannot be obtained or the area is not safe, we will refund your down payment in full.

It is very difficult to assess identically priced displays from different sources. Although it is important to compare estimates of proposed material content, showing total numbers and caliber sizes of the fireworks to be used, is equally as important to consider the quality of the fireworks and the expertise and enthusiasm of the operators/technicians.

Facts

Many big named display companies contract out their work to the lowest bidder and then put their famous name on it, and a price tag on that name. This is how they can shoot hundreds of shows a season and do many events on the same weekend. At Fireworks Florida we shoot all of our shows ourselves, we are full time professional pyrotechnicians and we place the utmost care and quality in our shows. This is how we can guarantee you a great show every time. This also gives you a better show because we do not have to pay the middle man. We avoid another middle man by buying our fireworks direct, not through a distributor giving you the best value for your money. .

We hold license's in the following states;

- (1) Licensed State of Ohio Pyrotechnics Operator Certified NFPA 1126.2006

We are approved Training course and will hold Continuing Education classes for Proximate Pyrotechnics and Flame Effects Safety for the State of Tennessee State Fire Marshal's Office, The State of Missouri State Fire Marshal's office and State of Ohio Trainer.

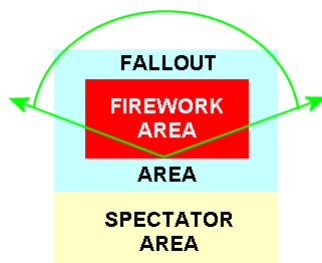

The fireworks!

Firework displays are best appreciated if the firing is brisk without blank pauses. In our experience, if the display is meant to climax the evening, it should last about 5 to10 minutes. But shows can run 20 minutes.

The site of the pyrotechnic display is one of the most important determining factors of what type of display is possible and the scope of the show.

The area in which the fireworks are launched must be clear of people, buildings trees and automobiles. In the event that area is limited, there are a variety of options that can be discussed with the pyrotechnic

company to design a fireworks show to fit those limitations. Clearance for our displays is 75 ft from the audience and buildings, 125 feet from roads and 150 feet from cars and boats. 40 feet from trees and power lines.

It is important to choose a fireworks company who has experience with multiple types of shows and venues. Fireworks are fired from beaches, rooftops, stadiums bullrings, racetracks and barges, in front of or behind stages with performers present, as a backdrop to entertainment or a reveal for the entertainer.
