

# Pyrotechnic effects menu;

## Gerbs

A **gerb** is a type of firework which produces a jet of sparks. It is a thick-walled tube filled with pyrotechnic composition and possessing a choke, which is a narrowing in the tube. Gerbs are often referred to as 'fountains'.

1.4 Air burst, fountain gerbs and a burn sign for the intro of Chuck Liddell "The Ice Man" @ RFC

## **Comets**

A large star that emits thick showers of bright sparks on the way up.

## **Mines**

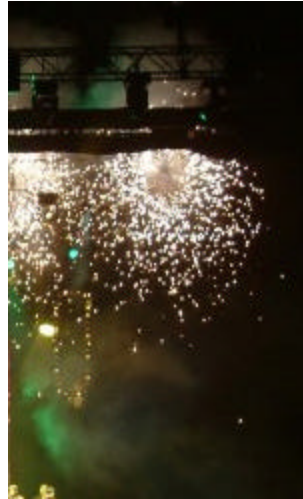

A firework similar to a shell that explodes in a mortar, igniting effects such as stars and launching them in a fan-shaped pattern into the air.

## Saxons

A spinning pyrotechnic effect.

## Waterfalls

A long series of fountains suspended upside-down, that when ignited produce long-lasting sparks that resemble a waterfall.

## Airbursts

A mid-air burst of sparks or color

1.4 Air burst, fountain gerbs and a burn sign for the intro of Chuck Liddell "The Ice Man" @ RFC

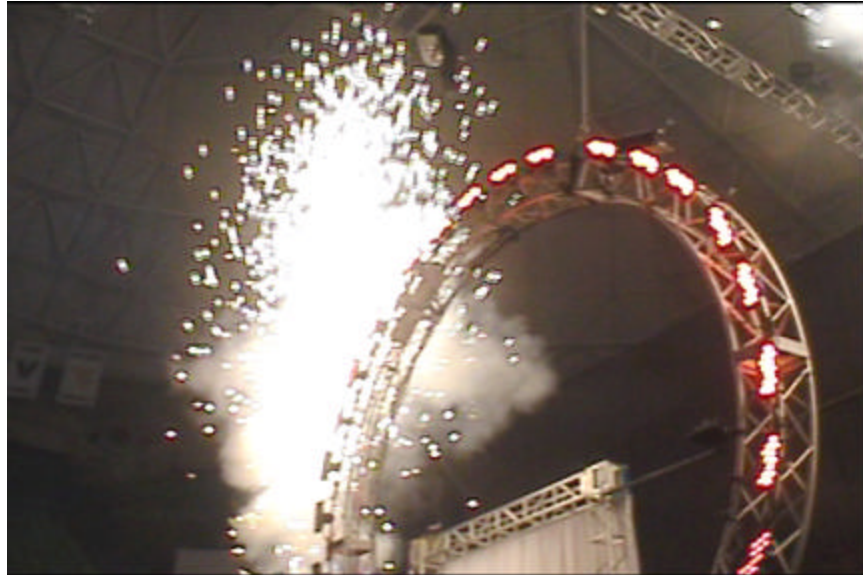

Fire balls and Flame projectors- a flame that is 3 seconds in duration

**Sparkle Cannon – a flash with sparks**

--  
**Line rockets**
